

Bryan Hudgins, the man, the myth, the legend has officially retired!!!! Bryan Hudgins started his career with the USPS on July 16, 1977. He later went on to be a union steward and that's where his talents were discovered and utilized for many years. He retired from the postal service on January 4, 2020. Even after his retirement from the postal service, he continued in the steward system as an area steward until September 30, 2021. No one knows for sure how many years he served in the steward system. I used to joke about Bryan sitting at the table when the first contract was written and that explained his vast knowledge of the contract. Regardless of how many years he served as a steward, he was a giant for the NRLCA.
