

IMPORTANT: New RRECS Activity Scans Delayed

Due to unforeseen circumstances, the implementation of RRECS Activity Scans for all rural carriers has been delayed until February 26, 2022. Training is to begin in the local offices on February 23, 2022. The NRLCA will provide our version of the training material later this week via this website. Rural carriers will still have 2 full weeks to acclimate to the new MDD entries before data collection goes live on March 12, 2022. Payment for the additional scans will be made via Form 8127 for regular carriers and Form 1314 for leave replacements until the March 12 implementation. A base-hour change will be made to account for performing the new activity scans effective March 12, 2022.
